*****  
* FileName:          template_PIC18.c  
* Dependencies:     See INCLUDES section below  
* Processor:  
* Compiler:          MPLAB C18 v.3.06  
* Company:           Microchip Technology, Inc.  
*  
* This file is a basic template for creating C code for a PIC18F  
* device. Copy this file into your project directory and modify or  
* add to it as needed.  
*  
* Add the suitable linker script to your project  
* - \mcc18\lkr\18f4520i.lkr if debugging with MPLAB ICD2  
* - \mcc18\lkr\18f4520.lkr if only programming the device  
* - \mcc18\lkr\18f4520_e.lkr if programming the device in extended mode  
* - \mcc18\lkr\18f4520i_e.lkr if debugging extended mode using ICD2  
*  
* If interrupts are not used, all code presented for that interrupt  
* can be removed or commented out with C-style comment declarations.  
*
